

Welcome to the Livyn family 🎉

Thank you for choosing Livyn Pure – your new standard for clean, healthier, and nourishing water with every shower. This is not just a filtered shower, but a unique system that combines filtration with Vitamin C and collagen – creating water that not only cleans, but actively cares for your skin and hair. Livyn Pure transforms your daily shower into a true wellness ritual – fewer harmful substances, more care, and a noticeably better feeling on your skin from the very first use.

Why Livyn Pure changes your shower experience

Unlike ordinary filters, Livyn Pure goes a step further:

Effectively removes chlorine, unpleasant odors, and harmful substances that cause dryness and irritation

Filters rust, sediment, and microparticles – for cleaner, safer water

Infuses water with Vitamin C, helping neutralize chlorine and support healthier, fresher skin

Contains collagen, helping maintain skin elasticity and providing a soft, hydrated feel

Contributes to softer, shinier hair and reduces the need for additional cosmetic products

Livyn Pure is the only shower on the market that combines filtration, Vitamin C, and collagen in one solution—delivering an experience beyond a standard filter.

Livyn Pure means less chemicals on your skin, fewer irritations, and more natural balance—every single day.

A Livyn home story

The Petrović family from Bar installed Livyn Pure in their bathroom. After just a few days, they noticed a difference—skin became softer and less dry, while hair looked shinier and easier to manage. Their children no longer experience redness after bathing, and the mother says that for the first time, the water feels like it truly nourishes instead of drying out the skin. Livyn Pure has become a small everyday luxury they enjoy daily.

One bathroom, one Livyn Pure—and a completely new shower experience.

How to make your Livyn Pure last

Before first use, let the water run for a few minutes to activate the filter

Replace the filter as recommended (typically every 3–4 months depending on usage)

If not used for a longer period, run water briefly before using again

Never do the following:

Do not use with water of unknown or microbiologically unsafe quality

Do not replace the filter while the system is under pressure

Do not expose the product to extreme conditions or physical damage

Thank you for your trust—we are confident that Livyn Pure will exceed your expectations from the very first shower.

Livyn Pure – more than a shower. Filtration, care, and luxury in one.
